

Diseño e impresión 3D.

Sabela Muñiz, creativa multidisciplinar especializada en 3D.

IMPRESIÓN 3D IDEAL

MODELO 3D IMPRIMIBLE

Imagen. Fuente: **Pixabay**
Autor: **Peggy_Marco**

- ✓ É UN VOLUME.
- ✓ DIMENSIÓNS MÍNIMAS AXEITADAS.
- ✓ É HERMÉTICO.
- ✗ SUPERFICIES SUPERPOSTAS OU CARAS DOBRES.
- ✗ XEOMETRÍAS QUE SE INTERSECAN.
- ✓ CARAS BEN ORIENTADAS.

IMPRESIÓN 3D

DIMENSIONS MÍNIMAS AXEITADAS

Modelo 3d imprimible

- Espesor das paredes
- Bordos afilados
- Dimensións dos detalles grabados ou en relevo.

Deseño

Lamimado da peza

Deseño

Lamimado da peza

Modelo 3d imprimible

É HERMÉTICO

Os vértices non formam unha cara

Modelo 3d imprimible

CARAS DOBRES OU SUPERPOSTAS

XEOMETRÍAS QUE SE INTERSECAN

Modelo 3d imprimible

CARAS BEN ORIENTADAS

Cara exterior

Cara interior

Modelo 3d imprimible

Mallas ordenadas

RECOMENDACIONES

Evitar booleanas

Modelo 3d imprimible

ANÁLISIS Y REPARACIÓN

- **3D Print Toolbox**

Analizar y seleccionar

- **Mesh/Clean Up**

Reparar

Modelo 3d imprimible

Vértices dobles

- Mesh/Clean Up/Merge by distance
- Alt+M/Merge by distance

Normales invertidas (Solido)

- Alt+N/Recalculate outside (Shift+N)
- 3D Print Toolbox/Clean Up/Make Manifold

Agujeros (Non Manifold edge)

- Fill (F), Loop Tools/Bridge, etc.
- Mesh/Clean Up/Fill holes
- 3D Print Toolbox/Clean Up/Make Manifold

Uniones de caras incorrectas (Bad. Contig. Edges, Intersect. Face, Sharp Edge)

Desplazar vértices a lo largo de su arista (G+G), suavizar, eliminar.

ANÁLISIS Y REPARACIÓN

Caras no planas (Non-flat Faces)

- Mesh/Clean Up/Split-no planar
- 3D Print Toolbox/Clean Up/Distorted
- Face/Triangulate faces (Ctrl+T)

Elementos sueltos

- Mesh/Clean Up/Delete Loose

Caras pequeñas (Zero Faces)

- Mesh/Clean Up/Degenerate dissolve
- Escalar, desplazar en los ejes (G+G)
